smixin™

THE HANDWASH THAT MAKES EVERYONE SMILE

Combi is a unique handwashing system with a 3-in-1 function. Water, soap and paper are automatically dispensed after activation via a precise sensor. Due to the optimal mix of water and soap with air, your hands will feel silky-clean after washing. The Combi is designed to be used outside and inside of the washroom.

- Communicate and advertise your USP on the 10inch screen while your serve your customers
- Options to place it on a counter-top, mount it on a wall or place it as a free standing autonomous unit (Flexibility as per your need)

With Smixin automated and touchless handwashing stations, we deliver an ease of access, flexibility and clean hands, wherever it is needed. We are in a continuous endeavour to encourage and support people to develop and maintain good habits.

smixin™

WHAT IS SMIXIN ?

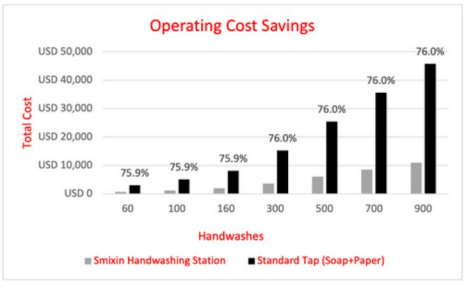
JOIN THE HANDWASHING REVOLUTION

SMIXIN stands for Smart Mixing Inside

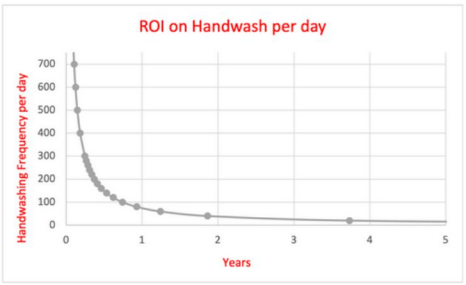
A Swiss innovation company committed to improving health and sustainability by developing efficient and economic hand washing solutions. We deliver a fully automatic hand washing process which, not only provides clean and soft hands but also a great user experience.

We create significant additional value for our customers not only through saving but also through possibilities to use our products to communicate individual messages of our customers

SAVE WITH US



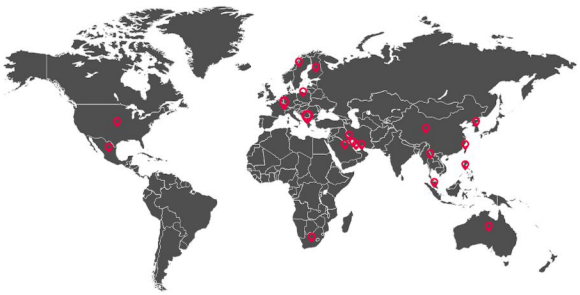
With Smixin solutions, you save about 76% in costs in comparison with a standard tap (soap+paper). Smixin savings are directly proportional to its usage; higher the handwashes, higher the savings per system.



Reference : These calculations are based on estimated commercial water and electricity prices for an average sized restaurant around the world
With one Combi system, averaging around 300 handwashes per day

The return on investment on one Smixin Combi premium is at 6 months at 300 handwashes per day. With our solutions, we provide best value for your money.

GLOBAL PRESENCE



CORE TECHNOLOGY (SMU®)

SMART MIXING UNIT (AIR+WATER+SOAP) FOR COMBI

Originally developed for Nestlé coffee machines of - now the heart of our Smixin systems. The Smart Mixing Unit (SMU ®) performs a unique emulsion of water, soap and air, that ensures instant hand coverage. This makes washing your hands with Smixin as effective within 12-15 seconds compared to the WHO recommended handwashing cycle of 40-60 seconds.*

*Proven by an independent institute ; HygCen

WASHING YOUR HANDS WITH ONLY ONE GLASS OF WATER

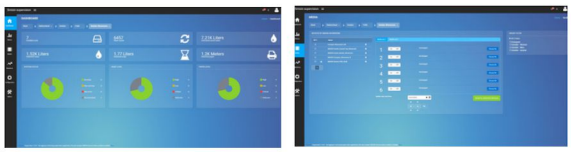
Smixin uses and saves*

0.2 litres of water = 90% of savings
0.3 ml of soap = 60% of savings
1 preset paper towel = 60% of savings

*Average use per handwash with Smixin machine

SMART SMIXIN

CONTROL, MONITOR AND ANALYSE YOUR SYSTEMS



Our smart dashboard displays the data on your water, soap and paper savings and allows you to monitor and configure the settings as desired. It also allows you to upload videos and pictures that you can use for advertisement and communication purpose on the display of the Combi premium model.

REASONS TO CHOOSE SMIXIN
