smixin™

THE HANDWASH THAT MAKES EVERYONE SMILE

The Compact is an innovative soap and water dispenser using the SMU℗. It is an extremely ecologic solution that becomes more attractive considering the cost savings it provides. With its modern design and pre-set process steps, we enforce a behavioural change amongst users. As a result, we improve hygiene levels within a certain population, such as a company, an airport or a school. **The Compact fits on any standard sink (retrofit)**.

With Smixin automated and touchless handwashing stations, we deliver an ease of access, flexibility and clean hands, wherever it is needed. We are in a continuous endeavour to encourage and support people to develop and maintain good habits.

12 SEC

STEP 1
Place your hands under the sensor

STEP 2
Soap your hands: a mix of water and soap is dispensed

STEP 3
Rinse with water

BENEFITS

SOAP + WATER = ULTIMATE MIX

It takes just around 12 to 15 seconds to wash your hands with Compact. The sensor recognises your hands and triggers a fully-automatic handwash, where our smart mixing unit (SMU℗) mixes water, air and soap to an all combined emulsion that leaves your hands clean and soft

It comes with options to remotely control, adjust and monitor unit performance via local WLAN of the unit (statistics, system & cycle parameters)

SMIXIN TECHNOPACK

MORE THAN A SOAP POUCH

Technopack is used in Compact
The Compact pouch (1.25L) = 4500 washes per pouch
2 types : CherryCare and ProCare

CherryCare

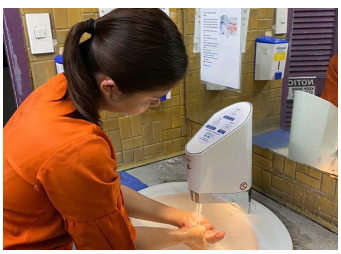
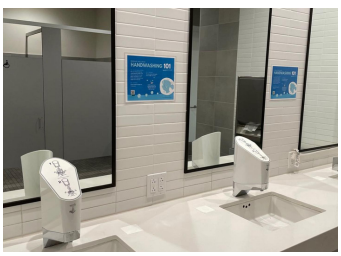
- EU Ecolabel and Aha! Allergy label



Compact retrofit to a sink in a restaurant

Compact retrofit on a mobile unit outside a sports event



Compact retrofit to a sink in a university

smixin™

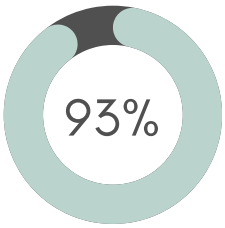
WHAT IS SMIXIN ?

JOIN THE HANDWASHING REVOLUTION

SMIXIN stands for Smart Mixing Inside

A Swiss innovation company committed to improving health and sustainability by developing efficient and economic hand washing solutions. We deliver a fully automatic hand washing process which, not only provides clean and soft hands but also a great user experience.

SAVE WITH US



With Smixin solutions, you save about 93% in costs in comparison with a standard tap (soap+paper). Smixin savings are directly proportional to its usage; higher the handwashes, higher the savings per system.

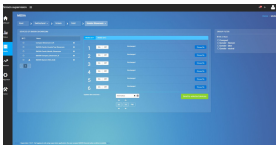
Reference :
These calculations are based on estimated commercial water and electricity prices for an average sized restaurant around the world With one Compact system, averaging around 300 handwashes per day

ROI is under 1 month

The return on investment on one Smixin Compact is under 1 month at 300 handwashes per day. With our solutions, we provide best value for your money.

SMART SMIXIN

CONTROL, MONITOR AND ANALYSE YOUR SYSTEMS

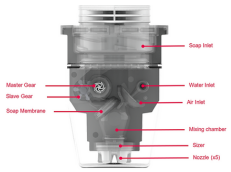


Our smart dashboard displays the data on your water, soap and paper savings and allows you to monitor and configure the settings as desired.

CORE TECHNOLOGY (SMU)©

SMART MIXING UNIT (AIR+WATER+SOAP) FOR COMPACT

Originally developed for Nestlé coffee machines of - now the heart of our Smixin systems. The Smart Mixing Unit (SMU) performs a unique emulsion of water, soap and air, that ensures instant hand coverage. This makes washing your hands with Smixin as effective within 12-15 seconds compared to the WHO recommended handwashing cycle of 40-60 seconds.*



*Proven by an independent institute ; HygCen

WASHING YOUR HANDS WITH ONLY ONE GLASS OF WATER
